

## The OW2 Community Showcases Open Source Middleware at JavaOne 2008

*Impressive line-up of the OW2 Community with a program of nearly 20 demonstrations of innovative open source middleware*

**San Francisco, May 6, 2008** – The OW2 Community is exhibiting for the first time at JavaOne 2008 and on this occasion has put together an impressive line up of nearly 20 demonstrations of enterprise-class open source middleware from its code base. All projects demonstrated at JavaOne benefit from professional support provided by independent companies either member of the OW2 Consortium or not.

On the OW2 booth, visitors will be able to appreciate OW2 middleware in action through demonstrations given by community members. The programme includes demonstrations on the following projects: JOnAS application server, EasyBeans Enterprise Java Beans 3 (EJB) container, Bonita workflow, Orchestra BPM, SpagoBI Business Intelligence, Spagic SOA/BPM Enterprise Integration, Spago4Q for software quality, Orbeon form builder, Xwiki for collaboration and applications, PEtALS Enterprise Service Bus (ESB), eXo WebOS for user interaction, FederID and electronic signature.

OW2 Members supporting the demonstrations on the OW2 booth at JavaOne include Bull, EBMWebsourcing, Engineering Ingegneria Informatica, eXo Platform, INRIA, Linagora, Orbeon and Xwiki. These members also provide professional support to the projects in the form of training, technical expertise, systems integration, etc.

The OW2 Consortium hopes its presence at JavaOne 2008 will help grow its membership in North America where its membership is still somehow limited.

*“We are proud to showcase such a broad range of open source middleware solutions from our community.”* says Cedric Thomas, OW2 Consortium CEO *“This confirms the strong momentum achieved by the OW2 community”* he adds.

### About OW2

Founded in January 2007 OW2 is an independent industry community dedicated to developing open source code middleware and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology Projects, including Acceleo, ASM, Bonita, eXo Platform, Funambol, JOnAS, Lombos, Orbeon Forms, SpagoBI and Xwiki.
